Englewood Cliffs, New Jersey: Prentice-Hall. pp. 385–386, 415. Dhotre, I.A.; Puntambekar, A.A. (2008). Systems Software. Technical Publications. p. 3-2. Conway

PL/C is an instructional dialect of the programming language PL/I, developed at the Department of Computer Science of Cornell University in the early 1970s in an effort headed by Professor Richard W. Conway and graduate student Thomas R. Wilcox. PL/C was developed with the specific goal of being used for teaching programming. The PL/C compiler, which implemented almost all of the large PL/I language, had the unusual capability of never failing to compile a program, through the use of extensive automatic correction of many syntax errors and by converting any remaining syntax errors to output statements. The result was tentatively delete. Simply put, notability was not established. Note that I discounted the Nature source since the person citing this subscription-only publication failed to establish what exactly was written there. Feel free to provide the pertinent excerpt on the talkpage for reconsideration (although it seems unlikely; if Nature termed it the best of its class, surely there'd be ample mention elsewhere. Instructional scaffolding is the support given to a student by an instructor throughout the learning process. This support is specifically tailored to each student; this instructional approach allows students to experience student-centered learning, which tends to facilitate more efficient learning than teacher-centered learning. This learning process promotes a deeper level of learning than many other common teaching strategies.
